

# Digital Asset Protection & Control

## with Novacoast & Seclore

### Our Partnership

Novacoast's experienced team utilizes industry-best processes, combining Seclore's Data-Centric Security Platform to protect and track your most important and confidential digital assets wherever they go. The Novacoast and Seclore partnership provides capabilities and expertise to minimize data theft and exposure, integrate with external 3rd party systems, along with maturing your overall data security program to create a wholistic data security strategy.

**With 25+ years of assisting customers around designing, implementing and maturing data security programs,** Novacoast, along with Seclore can assist your organization to ensure your digital assets are automatically protected before being shared with third parties such as external business partners and vendors.

### Together we help organizations with:

Protecting Their Digital Asset	Prevent Data Theft	Ensure Safe & Secure Collaboration
Identify risk from third parties	Report and track who can access sensitive data	Protect digital assets on-prem, in the cloud, or wherever the data goes
Prevent vendor devices or networks from being compromised	Ensure data is secured and protected when shared externally	Integration with Cloud Access Security Brokers (CASB)
Prevent rouge partner employees from misusing data	Revoke access to data, and shut down potential breaches	Embed security, privacy, and compliance policies even after downloaded from the cloud
Keep track of different compliances standards	Track the flow of customer's sensitive data	

### We Enable Organizations to Centrally Define and Modify Usage Controls:

#### WHO

can access the information

#### WHAT

can they do with the information

#### WHEN

does the access begin and end

#### WHERE

can they access the information
