

# PAM Starter Project

## Jumpstart Your PAM Journey with Novacoast.

Empower your organization's security infrastructure with Novacoast's PAM Starter Project, designed to accelerate the implementation of your Privileged Access Management (PAM) program. Our Starter Project is designed to provide a solid foundation for your PAM initiative, enabling you to hit the ground running with confidence and jumpstart your PAM journey before bringing it organization wide.

## PAM Starter Project Includes:

### Platform Design & Build

- ✓ Set up **one non-production and one production environment** in a single data center.
- ✓ **Seamless integration** with your existing Identity solution for User management and authentication.
- ✓ **Integration with your existing security solution** for logging and SIEM integration.

### Process Design & Build

- ✓ Develop processes for implementing and deploying **PAM** within your organization.
- ✓ **Credential Management:** how they are stored, organized, assigned, and managed.
- ✓ **Session Management:** supported protocols, recording, filtration.
- ✓ **Endpoint Management:** managed endpoints, enrollment procedures.
- ✓ **Deployment:** rollout of PAM services to users and resources.

### Use Case Implementation

- ✓ Enroll one application or system for **Credential Management**.
- ✓ Manage a limited population of credentials with rotation by the PAM system.
- ✓ Utilize **Session Management** for one application or system, including session recording and filtration.
- ✓ Employee one **Endpoint Management** Policy

### Training & Knowledge Transfer

- ✓ **Comprehensive documentation** of Solution
- ✓ **Documentation of Processes** developed during the project.
- ✓ **Knowledge transfer session** with your staff responsible for supporting and improving the PAM solution.
